

UST Inspector

MOBILE ELECTRONIC INSPECTION SYSTEM

PRODUCT SPECIFICATION

PRODUCT DESCRIPTION

The UST Inspector application is a mobile inspection system designed to specifically meet the needs of UST programs. State, federal, and commercial UST inspection programs have seen the following benefits:

- Time-savings (especially in pre-inspection and post inspection operations)
- Paperless operations
- Improved data quality and better documented inspections
- Standardized inspection reports and consistent even-handed enforcement
- A better educated regulated community

A more detailed description and demonstrations can be found at <http://www.mobilewright.com/USTInspector.aspx>

FEATURES

Version 8 of the UST Inspector application offers the following capabilities to underground storage tank inspection programs:

Tablet Application

- Synchronizing with UST registration data to make the entire set of facilities, contacts, and equipment accessible in the field
- Entering inspection data via a mobile electronic tablet optimized with business rules and a compliance engine.
- Automatically determining compliance and EPA performance measures based on data entry
- On-site wireless printing or emailing of enforcement letters
- Collection and printing of owner's/operator's signature
- Advanced scheduling on the tablet
- Attaching of electronic documents (site photos, scanned documents, etc...)
- Site diagramming
- Capturing of GPS coordinates
- Generating site management plans
- Adminstrating operator training quizzes

Management Console

- Managing the compliance library
- Editing the standard letter and report templates
- Editing the site management plan content and operator training quiz.
- Tracking compliance
- Deployment of software upgrades

PRODUCT SPECIFICATION

MobileWright has implemented the UST Inspector software for 10 state programs. MobileWright will customize the UST Inspector software to meet the needs of any state, federal, or tribal UST program. Hosting is an option for small UST programs (tribal, municipal, etc....).

UST INSPECTOR IMPLEMENTATION SERVICES

Implementation times vary depending on the complexity of the UST program (usually 10-12 months for UST compliance inspections). Implementation services include:

- Customization of the UST Inspector application user interface to fit the standard operating procedures of the UST program
- Integration of the UST Inspector application with the existing UST registration database with support from program IT staff
- Installation of the MobileWright inspection database within the programs UST registration database
- Installation and configuration of the synchronization web service to exchange data with the registration database
- Implementation of the inspection report and enforcement letters based on UST program supplied templates or existing inspection checklists/letters

Note: At the completion of installation any number of users may access the system. An installation package and instruction will be provided. A license is not required for each user.

SUPPORT AND MAINTENANCE PLANS

Annual Support Plans include support for 1 year for an existing implementation. MobileWright provides:

- Support via on-line meeting, telephone, and email (during the programs business hours)
- Maintenance and enhancements to meet program and/or regulatory changes and software version upgrades
- Access to MobileWright's issue tracking system

Note: MobileWright support does not include general help desk calls. General mobile device hardware and software issues (Not related to the UST Inspector software) like Internet connectivity and email configuration must be managed by the programs IT staff.

HARDWARE/SOFTWARE REQUIREMENTS

The UST Inspector software will support most Windows 10 Tablets that meet the minimum requirements of 6 GB RAM, HD screen resolution, WIFI and/or Ethernet network connection, Bluetooth, Cellular "Air" Card (if field synchronization is required), and pen and touch entry (recommended).

OTHER SERVICES

MobileWright also has experience with several states implementing UST websites for tank registration, operator training/testing, and tank fees/billing. Please contact MobileWright directly for a quote or any other information.
